

WSN and its teaming partner SRF Consulting provide preliminary design, final design, bidding assistance, and construction phase services for the reconstruction of six blocks in downtown Brainerd. The \$1.9 million reconstruction included sanitary sewer and storm drainage system replacement, water distribution system modifications, street and sidewalk replacement, and streetscape improvements.

The team worked through the preliminary design and streetscape elements in partnership with the Brainerd Lakes Chamber and the citizen-led Main Street Advisory Committee. The city and downtown businesses celebrated the new improvements with the completion of construction mid-summer 2009.

The Brainerd Main Street Program is holding a silent auction up to and during the banquet. All items will be available at the banquet for viewing. You may bid on items up to and during the event on-line at www.32auctions.com/organizations/227/auctions/270, or go to www.DowntownBrainerd.com and click on "silent auction" to view and bid on items. The auction will continue in real life at the dinner.
